

## INMARSAT REGIONAL BGAN (R-BGAN)

---

### Reliable High-Speed IP Connectivity - at Any Time!

Regional BGAN is the LATEST product from Inmarsat achieving speeds of up to 144k/bps across a shared channel. Regional BGAN is a satellite IP modem providing users the opportunity to access reliable, cost effective, high-speed data services in areas where there local telecommunications infrastructure is limited or non-existent.

### Internet Applications Include:

- Instant remote access to corporate LANs
- Digital Image Transfer
- Secure VPN connectivity
- File Transfer & FTP
- "Always on" high-speed internet access & e-mail (POP3 & IMAP)
- E-commerce
- Store & Forward video clips
- Database Queries

Inmarsat Regional BGAN service has migrated to the new I-4 satellite network coverage that is currently accessible in Europe, Africa, the Middle East and Asia. Coverage will be extended to North and South America by mid 2006. Similar to terrestrial GPRS mobile data services, the line is always "open," but charges are incurred according to the amount of data transmitted/received and not the amount of time you are on line.

**Popular applications compatible with Regional BGAN include:**
